WINTER GUIDE

Experience the best the coast has to offer in Piteå

IN THE EASTERN PARTS OF SWEDISH LAPLAND, along the 300 kilometre coastline beside the largest brackish water archipelago in the world, you will find the glistening coastal gem, Piteå. In the summer, Piteå play host to many summer visitors with the beaches and events, when dressed in winter garb, Piteå are more beautiful than ever.

Enjoy well prepared ski trails and let yourself be captivated by the majestic pack ice along the vast coastline. Piteå's subarctic climate is affected by the Gulf Stream, giving us warm summers and pronounced contrasts between the seasons here, the winter is for real. Steaming breaths by the light of the campfires and snow creaking beneath your shoes. Here, the winter ice is an adventure arena, the Northern Lights are the lights in the sky and nature itself is the lifeblood of it all. Not to mention the charming accent that is probably best experienced in the surrounding, idyllic villages.

A wide range of entertainment,

activities and events are on offer with options for adults and children alike. Try ice skating at the Piteå Ice

Arena and visit the entertainment metropolis Pite Havsbad – where food, entertainment and adventure are all available throughout the four seasons. At the Lindbäck Stadium you can ski on the same trails as the international elite, and on the slopes you can try both downhill skiing and snowboarding.

Yes, there is something special about the spirit of the region, that makes it easy to feel welcome in Piteå, not least because of the warmth of the easy-going, hospitable locals. The airport is 45 minutes away and the flight to Stockholm only an hour away. About an hour away by car, you will find the largest undammed rapid in Northern Europe, Storforsen, a powerful natural phenomenon and a magical sight. A warm welcome to Piteå, Swedish Lapland.

Here, you can really feel at home.

THERE IS SOMETHING SPECIAL about the relationship that Piteå's locals have with the sea. It might be difficult to imagine that these are some of Sweden's warmest waters in summer, when you have just heard the thundering sound of pack ice being crushed against the hull of an icebreaker. However, the sea has always been important to the people of Piteå, in summer as well as in winter.

In 1666 the city centre was moved to its current location, in order to be closer to the coast. Generations since have found their livelihood in fishing and shipping. The locals enjoy the opportunities

of the sea all year round, not least in winter. The majestic, white vistas of the Gulf of Bothnia, create a winter wonderland for ice skating, skiing, dogs-ledding, snowmobiling and more.

The centrally located Piteå Ice Arena serves food and offers hire of longdistance ice skates, free hire of kicksleds and other gear for thrilling, wonderful adventures on the ice. Being here in the pleasant early spring sun is one of the highlights of the year, the locals come here to barbecue, enjoy a Swedish fika, hang out and take part in kicksled competitions and other such activities.

SAFETY ON THE ICE

Test the ice before you set out and always bring a buddy, and other equipment. If someone has gone through the ice, call 112, and then use the extended arm during your rescue mission.

LEARN THE NOBLE ART OF ICE FISHING

In early spring you will have the opportunity to try your luck at fishing in the peaceful bay at Jävrebodarna, with tranquil piers all around. Here you will find sea-farmed rainbow trout, giving you a tug-of-war with nature. Learn the secret tips and tricks of winter fishing or just relax and enjoy the calm. Bring your own equipment or rent on site.

Skiing towards the horizon

Go on a tour by yourself, over the ice or through the beautiful, wintery forest landscape. As soon as snow has covered the ground, trails are prepared and the ice is ploughed. In many ways, Piteå in Swedish Lapland is a paradise for skiing enthusiasts, try the great trails at Grisberget, close to the city centre, or the well prepared competition trails at the Lindbäck Stadium. www.skidspar.se

EXPERIENCE THE *magic* OF CLEAR ICE

A magical experience no matter if you go for a long tour over the open ice or a short one on the well prepared ice track at the Piteå Ice Arena. The locals are out as soon as the waters have frozen over, this is the best time to experience the phenomenon. Remember that you need to be informed about the ice and how the weather affects it in order to enjoy it safely.

An ice cold adventure aboard an icebreaker

Take the opportunity to experience an extraordinary winter adventure. Going aboard the icebreaker on a clear, cold winter's day and experiencing the uncompromising push through the pack ice, leaving an open waterway behind, really is quite extraordinary. You can also try a true ice bath, wearing a special suit. Step down into the ice and feel your pulse racing, in the secure knowledge that the suit gives you complete protection against the cold. In addition to scheduled departures, group bookings are also available. www.icebreaker.fi/arcticexplorer

GO ON A winter adventure

Being out in the snow is one of the most beautiful things to do in northern Sweden in winter.

THROUGH THE FOREST, out onto the sea ice. Here you can whizz through the world behind a pack of sled dogs, glide over the breathtakingly clear ice on long distance ice skates, pole your way along the ski trails or brave the winter landscape on snowshoes. A snowmobile adventure will raise your pulse and give you the freedom to cross forests and ice on longer adventures. Experiencing the teamwork between the musher and their dogs is a unique experience as the dog sled rushes through the frosty, snow covered landscape.

Don't forget the ice pikes when you set out on winter adventure.

Foto: Svedjekojan

Try dogsledding

At Tranuträsk, just north of Piteå, you will find 55 happy, eager and strong Alaskan Husky dogs waiting to take you on a winter adventure. Ride along or try driving your own sled, giving you a rare adrenaline rush as you realise that you are commanding the dogs in a natural synergy.

OUT ON THE ICE

During the spring winter, an ice road is plowed on the sea ice for walking, skating, skiing or kicking. The tracks starts right in the center of Piteå and the café and skate rental is open when the weather permits.

Why not try one of our Kicks? They are available for free at the parkinglot.

Charming shopping city

MED SNÖ- OCH ISFRI GÅGATA

PITEÅ'S SHOPS AND TRADERS have extensive experience when it comes to welcoming visitors. You can tell from the hospitality and the warm reception, stemming from the inviting spirit of small town charm. The malls have a natural place in the city and they are complemented by smaller, more individual boutiques where visitors can browse vintage and second hand goods. The main pedestrian street is heated and thus free from snow

and ice. Its history began in 1961, when it became the first pedestrian-only street in Sweden. The city's 'big stars' have had their names preserved in the street. If you are looking for something special, you can visit a traditional farm shop and a vintage country store, where you can meet craftsmen in person. At the Heta Hyttan glassworks you can try blowing your own glass.

Local food culture

THAT GIVES YOU ENERGY AND LEAVES YOU WANTING MORE

LOCAL INGREDIENTS, a proud culinary heritage and not least the local signature dish palt (a particular kind of Swedish potato dumpling) is on the menu. In Piteå, there is fine dining as well as a wide range of lunch restaurants. There is of course the local pitepalt but more than that you will get to discover the varied local cuisine with fish from clear, nearby waters, wild game from the forests, topped off with the deliciously nutritious Swedish Lapland berries. The untouched, pure nature is your best friend and here, the path from raw ingredient to your plate is always as short as possible.

The pitepalt is a signature dish popular with the locals, a culinary experience.

Taste
THE PALT

Piteå's signature dish has not one true recipe, everyone has their own variety. The basics are potatoes, flour, salt and a filling of salted pork. Everything is prepared and then boiled as round potato dumplings and then enjoyed with lingonberry jam, butter and ice cold milk. Heaven on a plate, according to the locals.

The oldest parts of the medieval rock-hewn church were built as early as the 15th century. The lower part of the current clock tower was built then and is probably the oldest preserved building in northern Swedish Lapland. The cottages that were used by churchgoers who had travelled from the far ends of the parish are now part of the well-preserved church town. The church and the nearby church town and museum are popular excursion destinations.

Welcome to Sweden's northernmost destination!

In Swedish Lapland you will find unique arctic experiences. Thanks to the warm Gulf Stream, here high up by the Arctic Circle, you can experience seasons with great contrasts between polar nights with sparkling northern lights in a white winter landscape and warm summers filled with swimming and hundred days without night under the midnight sun. In the east – a 300-km coastal stretch facing the world's largest brackish water archipelago, with thousands of islands. Sandy beaches, fishing camps and unique produce. In the west – vast mountains, brooks with water so clean you can drink from them and lots of adventures around the corner. In between the quiet, enigmatic, open-handed forest and river valleys from Skellefte River in the south to Torne River in the north-east, all with their unique distinctive characteristics to offer. Traditions and cultures are strong here, and love of nature is even stronger. This is our everyday-life, and we invite you to share it with us.
